Executive Summary & Business Recommendations

• Business Performance :

- Total transaction value exceeded **24.79M**.
- Transaction success rate reached **95.1%**, indicating a stable platform.
- Cashback payouts exceeded transaction fee revenue, resulting in a negative net fee position.

• Customer Behavior :

- Approximately **4,000 unique users** used the wallet.
- **Bank Transfer** was the most frequently used payment method.
- Android devices generated the majority of transactions.
- Most activity occurred during weekday business hours.

• Product & Merchant Performance :

- The **Streaming Service** category generated the highest total revenue.
- The **Basic Plan** product ranked first in transaction value.
- Revenue is concentrated among a relatively small number of merchants.
- Loyalty points are highest in the top-performing product categories.

• Operational Performance :

- Overall transaction success rate remained above **95%**.
- Failed and pending transactions represented only a small percentage of total activity.
- Success rates were consistently high across all payment methods.
- No major operational anomalies were observed during the analysis period.

• Business Recommendations :

- Review the cashback program because cashback payouts currently exceed transaction fee revenue.
- Expand partnerships with high-performing merchants to maximize transaction volume and revenue.
- Allocate marketing budget toward high-performing product categories to maximize return on investment.
- Continue investing in mobile user experience because mobile devices account for most transactions.
- Monitor payment methods with relatively lower success rates to reduce failed transactions.
- Schedule marketing campaigns during peak transaction hours to maximize customer engagement.
